DHRUVKUMAR PRAJAPATI

SOC Analyst
Hamilton, ON • dhruv97270@gmail.com • LinkedIn • GitHub • Portfolio

SUMMARY

SOC Analyst with a Bachelor's in Computer Science and postgraduate credentials in Cyber Security Analytics and Artificial Intelligence. Hands-on with log monitoring, alert triage, phishing analysis and incident escalation in Splunk, Wazuh and the Elastic Stack through TryHackMe SOC Level 1 and a Wazuh home lab. Built three browser-based triage tools for phishing emails, network traffic and Windows Event Logs. Comfortable with 24/7 shift monitoring.

TECHNICAL SKILLS

SIEM & Log Monitoring: Splunk (SPL), Wazuh, Elastic / Kibana, KQL, log correlation, alert tuning, dashboards
Detection & Response: Alert triage, incident escalation and reporting, IOC analysis, MITRE ATT&CK, Cyber Kill Chain
Phishing & Malware: Email header analysis, SPF/DKIM/DMARC, URL and attachment analysis, malware behaviour basics
Network & Endpoint: TCP/IP, Wireshark, Snort, IDS/IPS, Windows Event Logs, Sysmon, Linux logs, EDR basics
Tools & Scripting: VirusTotal, AbuseIPDB, threat intel feeds, ticketing and case notes, Python, Bash, SQL

EDUCATION

Cyber Security Analytics | Mohawk College, Hamilton, ON *2022 – 2023*
Coursework: Security Operations, Cyber Security Assessment and Testing, Communication and Network Security, Identity and Access Management, Risk Management and Response, Evolving Threats, Auditing and Security Review

Artificial Intelligence – Architecture, Design, and Implementation | Georgian College, Barrie, ON *2023 – 2024*
Coursework: Python Programming for Data Science, Machine Learning Frameworks, Neural Networks Optimization and Deployment, AI Infrastructure and Architecture, AI Capstone Project

Bachelor of Computer Science | Sankalchand Patel University, Visnagar, India *2017 – 2021*
Coursework: Computer Networks, Operating Systems, Database Management Systems, Data Structures, Web Programming

CERTIFICATIONS

TryHackMe SOC Level 1

- **SOC Operations:** Triaged alerts, separated true from false positives, and escalated incidents in **Splunk** and **ELK SIEM**.
- **Phishing & Threat Intel:** Analysed headers, **SPF/DKIM/DMARC**, URLs and attachments; enriched IOCs (**VirusTotal**, **AbuseIPDB**).
- **Log & Network Analysis:** Investigated **Windows, Linux and web logs**; detected intrusions with **Wireshark, NetworkMiner, Snort**.
- **Frameworks & Tools:** Applied **MITRE ATT&CK, Cyber Kill Chain and Pyramid of Pain** in capstones; **EDR** and **SOAR** fundamentals.

PROJECTS

Phishing Email Analyser ↗

- Developed a phishing triage tool automating **email header analysis** (**SPF/DKIM/DMARC**, Reply-To spoofing) with **27 detection rules**.
- Flags **BEC**, credential-harvesting links, look-alike domains and malicious attachments; **risk score** mapped to **MITRE ATT&CK**.

Windows Event Log Triage Tool ↗

- Built **correlation rules** across **10 Windows Security Event IDs** detecting **brute force, password spraying, privilege escalation, log clearing** and **encoded PowerShell**.
- Prioritises suspicious accounts with an **investigation score** and activity timeline to support alert triage and incident escalation.

Network Traffic Triage Tool ↗

- Analyses **Wireshark** captures with **7 tunable detections**: **port scanning, SYN-heavy traffic, DNS/ICMP anomalies, C2 beaconing**.
- Generates a prioritised triage report with per-host scoring and **false-positive** context to guide investigation.

Wazuh SIEM & File Integrity Monitoring Lab ↗

- Deployed a **Wazuh SIEM** (manager, indexer, dashboard) on an Ubuntu Server VM and onboarded a **macOS endpoint agent**.
- Configured real-time **File Integrity Monitoring (FIM)** in ossec.conf and validated it by creating, modifying and deleting files, confirming alerts in the dashboard.

EXPERIENCE

Retail Store Supervisor | BigBear Foodmart, Hamilton, ON *Sep 2024 – Present*

- Supervise daily operations and shift staff in a fast-paced store, handling customer issues calmly and **escalating problems** to management.
- Follow strict **cash-handling, opening/closing and loss-prevention procedures**, spotting discrepancies in POS transactions and inventory and **documenting incidents** accurately.

Software Developer | Nivaan Infotech, Visnagar, India *Jan 2021 – Aug 2022*

- Collected, cleaned and prepared **open-source datasets** to train and test **machine learning models** in **Python**.
- Developed and integrated **REST APIs**, debugging and troubleshooting issues across the application.
- Collaborated on code reviews, testing and documentation, and supported teammates in resolving technical problems.
